

TOKEN MANAGEMENT SERVICE CONNECT THE DISCONNECTED.

Token Management Service provides a universal token to connect your omni-commerce experience and gain a singular view of your customers no matter how they shop and pay.

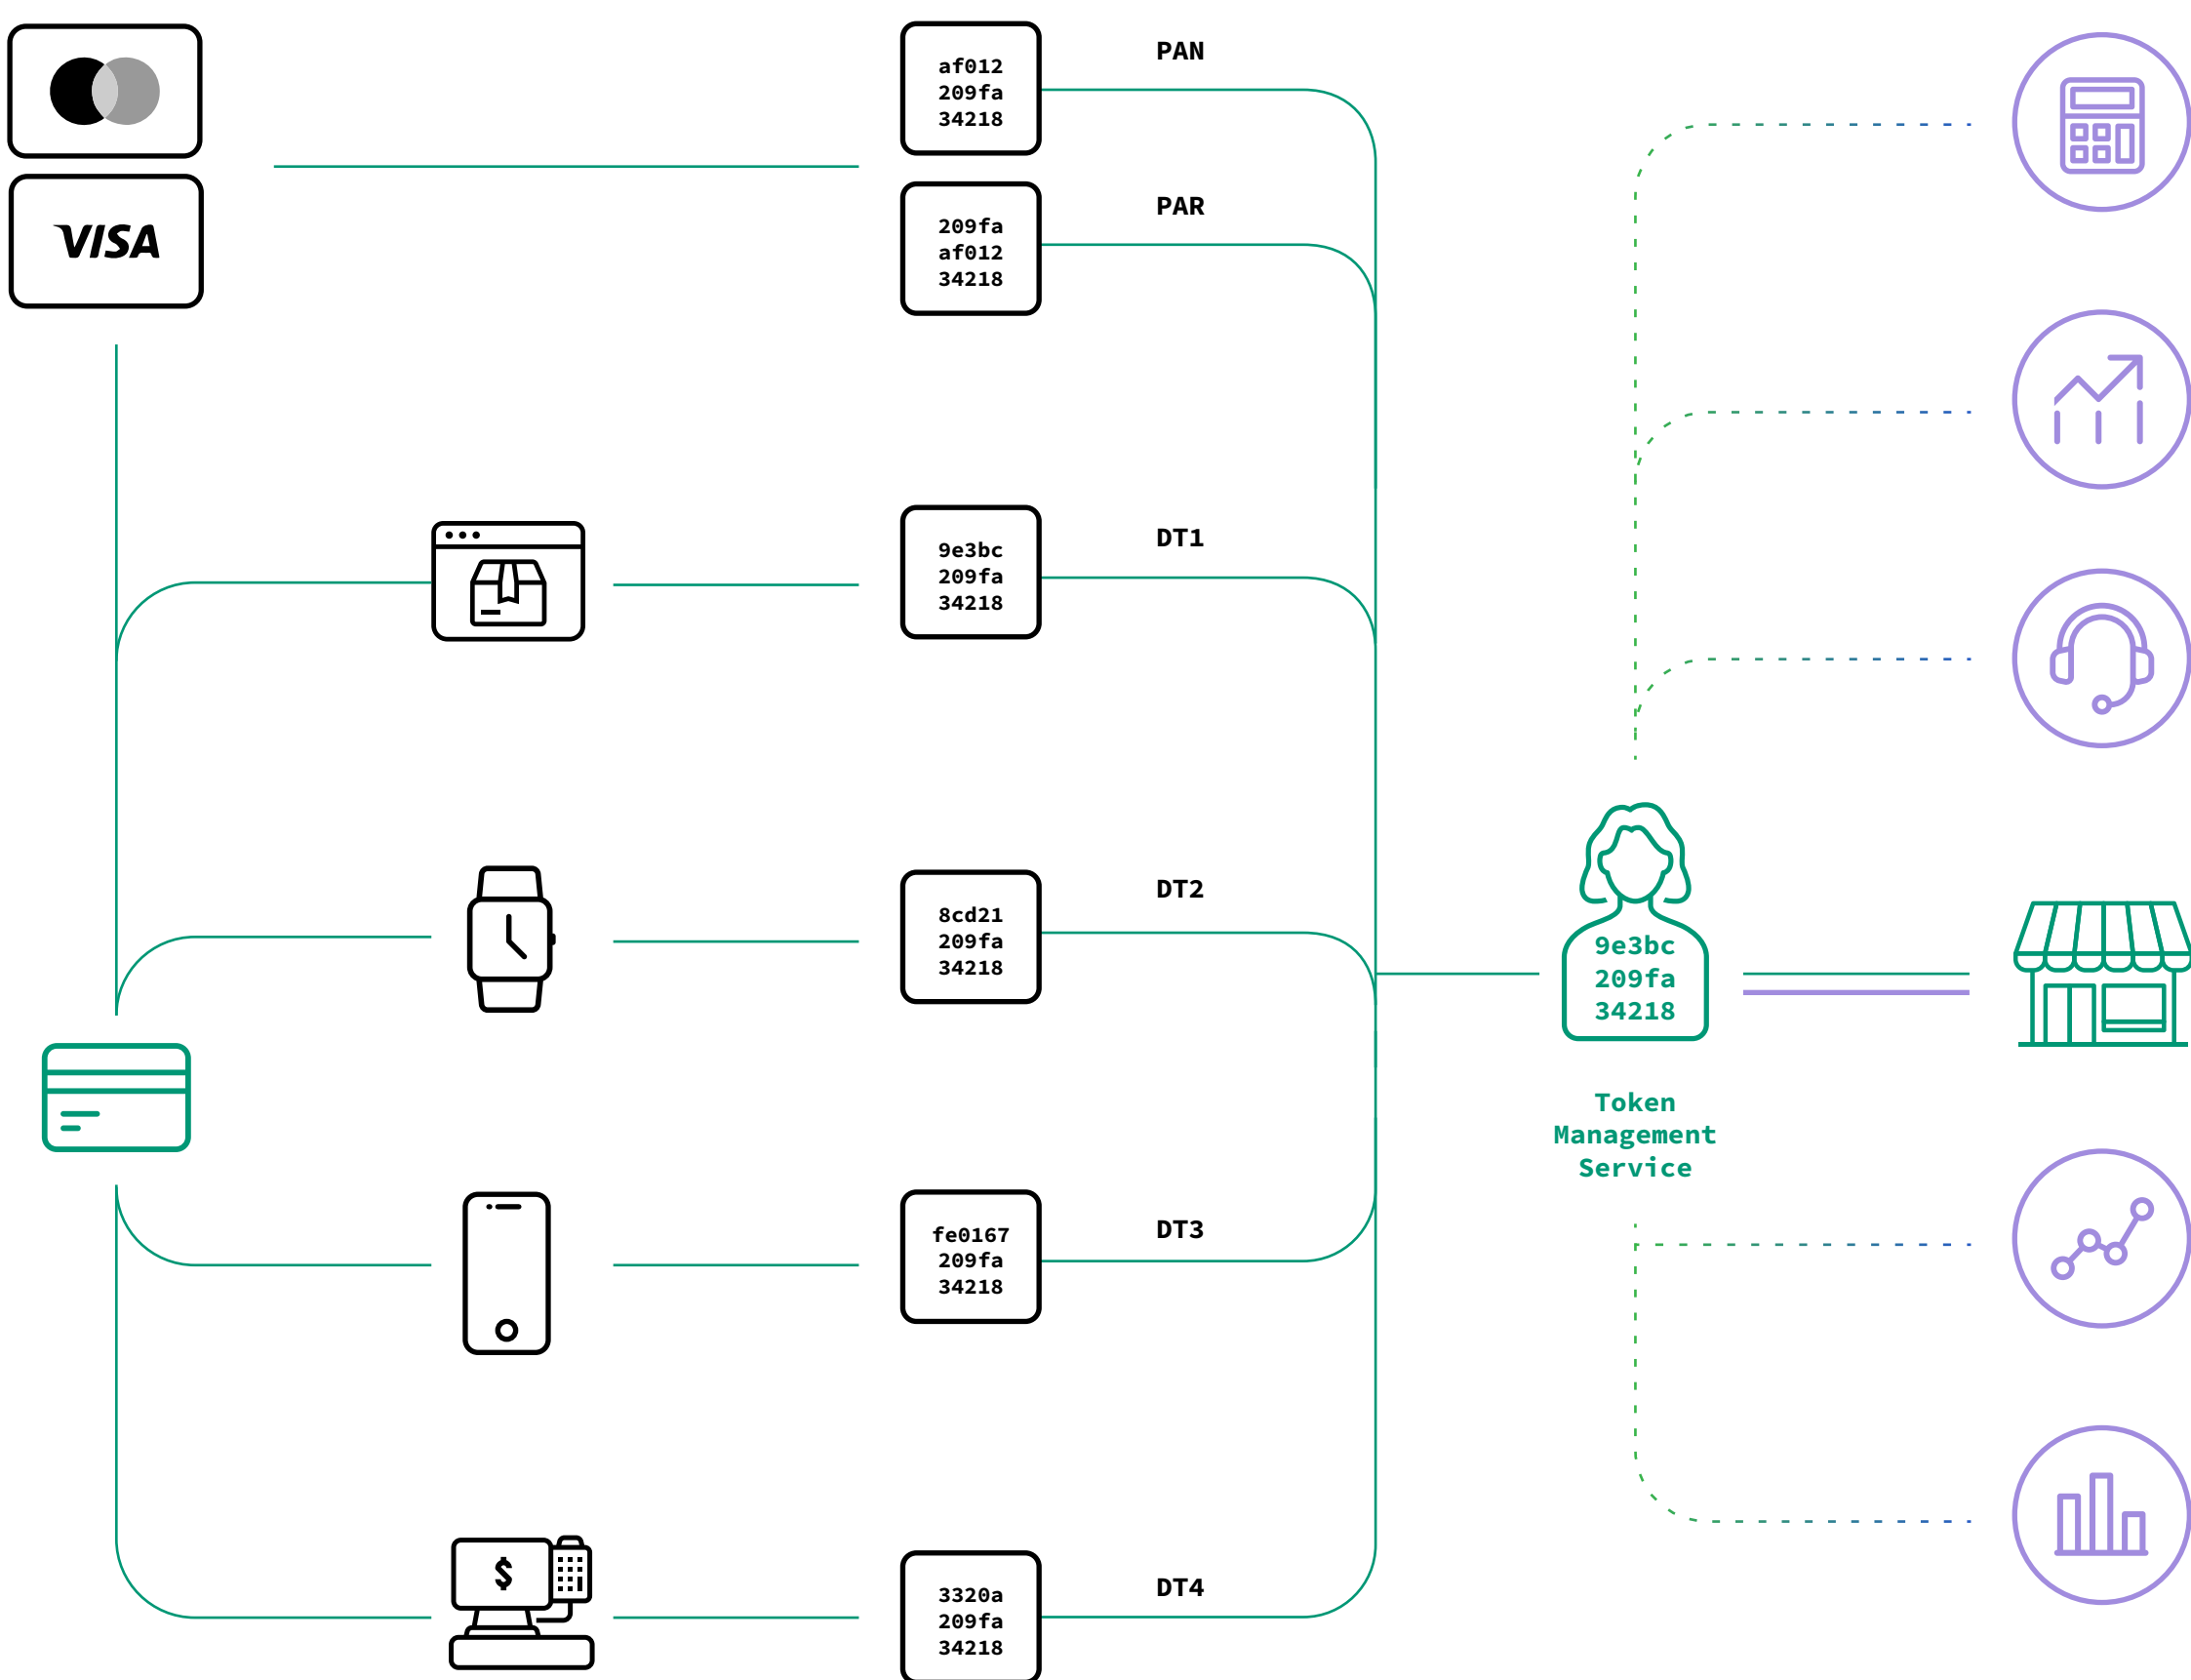

Without Token Management

Each device, payment type, and even network, provide their own tokens. Matching payment methods across channels and devices is challenging, resulting in a broken customer experience and loss of valuable insight.

With Token Management Service

Unify your token management with a single service. Integrate payments, call centers, analytics, loyalty programs and CRMs — no matter the payment type.

Integrate any data source, securely.
